Brown Drainage and Construction had a dynamic 2007.

As you may not be aware, in September Brown Drainage changed their trading name to **Brown Drainage and Construction Limited**.

The reason that we have re-launched ourselves as Brown Drainage & Construction Ltd, is because we are a contributor to the infrastructure growth in this country. We feel it is not only our duty to do the job right, but to understand how we can add value to local communities, protect the environment and consider sustainability. We wanted to show people our commitment to understanding the impact of our work and I think that our new tagline 'Enhancing your Environment' sums this up.

This mammoth task was a huge success & I am sure you may of seen the new sign written vehicles & machinery on your travels.

In conjunction with the new launch our website was created. www.browndrainage.co.nz. It's definitely worth a look and is updated regularly as we undertake projects.

With the Company growing and expanding the Management Team had to grow. Kirsty has been employed as a Personal Assistant. Those at the launch would have met her or maybe you have had dealings with her. She has become an invaluable member of our team.

With the huge amount of projects up for tender, we are in the process of interviewing for a Quantity Surveyor. This will enable us to tender for more jobs.

The benefit to you as Clients is that we will be able to complete your project faster and more efficiently.

Here is a brief run down of some of our achievements.

- ∞ Our biggest achievement of the year was successfully completing Taupiri Waste Water Contract. Taupiri is now connected to the main sewer lines and all septic tanks are filled in and obsolete.
- ∞ The team had a short break over Christmas and started back early in January at The University of Waikato, creating a service tunnel.

During this project it was unfortunate that Kerry Maher decided to leave and start a new adventure working for another company. We wish Kerry well and his knowledge is a tremendous asset to him.

We finished stage 1 on target and within budget. The team earned a well deserved BBQ on the finishing day of stage 1.

- ∞ We have also been involved in a number of dewatering projects. Even though there is a drought in the Waikato, the water is still flowing well under the ground in abundance.

Brown Drainage and Construction has been in the business for over thirty years & have over 100 years of experience in their Management Team alone. The knowledge within the team is phenomenal. We changed our name and added Construction as we are not just a drainage Company.

The various services you can benefit from:

- ∞ Stormwater Drainage
- ∞ Wastewater Drainage
- ∞ Water Main Reticulation
- ∞ Earthworks
- ∞ Gabion & Reno Mattress Installation
- ∞ Dewatering Installation & Hire
- ∞ Plant & Labour Hire
- ∞ Civil Construction – From house sites to total reticulation of Towns
- ∞ Concrete Inlet & Outlet Structures
- ∞ Carpark & Driveway Installation

If we can be of any assistance to you: as no job is too big or small.
Please feel free to contact us.

Enhancing the Environment is something we are passionate about and take great care in doing so.

Have a Most Fabulous Day!

Michael Draper
CEO
